### **Economics: An Introductory Analysis by Paul A. Samuelson ...**

Paul Anthony Samuelson (May 15, 1915 – December 13, 2009) was an American economist. The first American to win the Nobel Memorial Prize in Economic Sciences, the Swedish Royal Academies stated, when awarding the prize in 1970, that he "has done more than any other contemporary economist to raise the level of scientific analysis in economic theory".

### **Economics : an introductory analysis : Samuelson, Paul ...**

Published: New York, 1967. Paul Samuelson's Economics is the very definition of the "standard text in its field": according to the New York Times, it was the nation's best-selling textbook for 30 years. Originally published in 1948, it's still selling briskly more than 60 years later. Generations of budding economists and countless other college graduates have learned the basics of supply and demand, interest and capital, market structure, and just about everything else concerning ...

### **Year 107 - 1967: Economics: An Introductory Analysis by ...**

Worse, in the introductory chapter Samuelson uses a hokey, irrelevant pictorial argument to try to convince both himself and the reader that physics is as unscientific as neo-classical econ theory. For good information about econ theory, see the following books: Ormerod's The Death of Economics, Mirowski's More Heat than light, and Osborne's book.
