NEW YORK (AP) — Riverdale Nursing Home in the Bronx appears, on paper, to have escaped the worst of the coronavirus pandemic, with an official state count of just four deaths in its 146-bed facility. The truth, according to the home, is far worse: 21 dead, most transported to hospitals before they succumbed.

New York's true nursing home death toll cloaked in secrecy

Background: The high prevalence of unfinished nursing care reported in recently published studies, as well as its connection to negative effects on nurse and patient outcomes, has made unfinished care an important phenomenon and a quality indica- tor for nursing activities.

Unfinished nursing care in four central European countries

Nursing home nurses lack time and resources for complete care. For years, extensive evidence from hospitals has shown that nurses are more likely to leave necessary patient care unfinished when employed in settings with insufficient staff and resources. This "missed care" has been linked to poor care quality, increased adverse events, and decreased satisfaction with the health system.
